

Decarbonisation Resource Pack for Schools – Solar Maintenance, Financing, and Building Management

Developed by the Northeast & Yorkshire Net Zero Hub.

Solar Maintenance

Schools Solar Webinar Recording

- The webinar, organised by the **Hub** and facilitated by **Let's Go Zero**, explores school specific solar concerns.
- Andy Tanner from **Laser Energy** explains the maintenance requirements of existing solar systems on schools, and Tom Lleyveld from **AECOM** offers an insight into the **GBESP** delivery outcomes and lessons learned.
- [Click here to watch the webinar.](#)

Rooftop Operations & Maintenance Guidelines

- This guidance document has been developed by **Solar Energy UK**.
- This edition provides clear, practical advice for the safe maintenance, cleaning, and monitoring of domestic and commercial PV systems, while emphasising the need to follow all relevant legislation and industry best practice.
- [Click here to download the guidance document.](#)

Solar PV Financing

Rooftop Solar PV Installations – Procurement Specifications & Financial Business Case Modelling

- This guidance document has been developed by the **Greater Southeast Net Zero Hub**.
- This document offers clear information and guidance on developing business cases for solar installations.
- [Click here to access the guidance document.](#)

Smart Metering

Public Sector Smart Meter Guide

- This guidance document has been developed by the **Department for Energy Security and Net Zero**.
- An introductory guide to smart meters for smaller sites in the public sector including schools and local authorities
- [Click here to access the guidance document.](#)

Building Management

Practical Path towards Net Zero Carbon

- This is a guidance document developed by the **Church of England**.
- The document contains a comprehensive and easy to understand checklist of actions for schools to reduce their carbon emissions.
- [Click here to access the guidance document.](#)

Energy Management Systems Webinar

- The webinar was delivered by the **Northeast & Yorkshire Net Zero Hub**.
- Niamh Allen from **Sustainable Smart Technologies** discusses their approach to Energy Management Systems and how this can generate significant cost and carbon savings for public sector organisations
- [Click here to watch the webinar.](#)

Additional Support

- Further support is available through **Let's Go Zero**. Webinar recordings looking at school specific decarbonisation opportunities are [available here](#). Likewise, you can sign up for free support across all **Department for Education** pillars of climate action, including curriculum, adaptation & resilience, and biodiversity, by [clicking here](#).
